

Report on GTU Lecture hosted by AIIE
Keynote Speaker: Dr. Charles M. Savage
15 March 2016, AIIE

Adani Institute of Infrastructure Engineering (AIIE) hosted a GTU lecture titled *Infrastructure: Outer and Inner. How do we best put them together in the Low Carbon Era?* This lecture was delivered by Dr. Charles M Savage, Author of *Fifth Generation Management* and President, Knowledge Era Enterprising (KEE), International, Munich, Germany.

In this insightful and inspiring address, Dr. Savage highlighted the crucial anvil at which our planet stands today in face of an impending low carbon era. He also emphasized the monumental challenge that infrastructure experts face. Dr. Savage said: “It is now not enough to just build infrastructure for convenience, but there is an urgency to build a low carbon infrastructure”.

Dr. Savage’s address also highlighted the gravity and import of this crisis and how it has compelled the human society to redesign our global economy and redefine education, business and economy. He said that in wake of a global world, geography is now history and the crisis does not confine itself to country borders.
